

PROJECT: 301 To 304
(Self-Designed Project)

āRtEMON

Welcome to “āRtEMON” an innovative project that bridges the gap between art and technology. Inspired by **Virtual Reality (VR)**, Artemon transforms the traditional art gallery experience into an immersive journey. Imagine stepping into a boundless virtual space where masterpieces come alive. With Artemon, we address the limitations faced by physical galleries: space constraints, restricted accessibility, and time-bound exhibits. In this VR realm, you can explore art from any angle, interact with it through touch and sound, and personalize your encounter. Artemon is a canvas where art transcends boundaries, inviting you to discover, appreciate, and collect in a whole new dimension.
